

## SUMMARY

Detail-oriented frontend engineer with 2.5 years of experience specializing in React.js, Material UI, Redux Saga, Next.js, and React Query. Passionate about crafting seamless user experiences through innovative design and efficient data management. Seeking to leverage expertise in frontend technologies to contribute to dynamic projects and drive impactful results.

## EDUCATION

### Gujarat Technological University

Bachelor of engineering in Computer  
2016 – 2020

## SKILLS

- Proficient in React.js for building dynamic and interactive user interfaces.
- Experienced in utilizing Material UI for designing visually appealing and responsive components.
- Skilled in Redux Saga for managing complex application state and asynchronous logic.
- Knowledgeable in Next.js for server-side rendering and improved SEO.
- Familiar with React Query for efficient data fetching, caching, and synchronization.
- Strong understanding of HTML, CSS, and JavaScript for frontend development.
- Capable of collaborating with cross-functional teams to deliver feature-rich web applications.
- Detail-oriented with a commitment to code quality, best practices, and continuous learning.
- Effective problem-solving skills and ability to adapt to new technologies and challenges.
- Excellent communication and teamwork abilities, facilitating productive collaboration and project success.

## PROFESSIONAL EXPERIENCE

### React JS Developer

Solulab | November 2021 – May 2023

- Developed and implemented complex React components for a large-scale web application, resulting in a more intuitive and user-friendly interface.
- Optimized application performance by analyzing and refactoring code, resulting in a 30% increase in page load times.
- Collaborated with cross-functional teams to develop new features and improve existing ones, ensuring that deadlines were met and quality standards were maintained.
- Actively participated in code reviews and provided constructive feedback to team members, contributing to a culture of continuous learning and improvement.

### Frontend Engineer

EnverX | May 2023 – Jan 2024

- Designed and implemented visually appealing and responsive user interfaces using Material UI components, enhancing the overall look and feel of the application.
- Leveraged Material UI's theming capabilities to maintain consistency in design across multiple pages and ensure a seamless user experience.
- Conducted A/B testing and user feedback analysis to iterate and improve UI designs, resulting in higher user engagement and satisfaction.
- Integrated Material UI's grid system for flexible and adaptive layout designs, accommodating various screen sizes and devices.
- Collaborated closely with UX/UI designers to translate design mockups into functional React components, ensuring alignment with design specifications and brand guidelines.
- Developed and implemented complex React components for a large-scale web application, seamlessly integrating Redux for efficient state management and ensuring a more intuitive and user-friendly interface.

### Frontend Engineer

Vericap | Feb 2024 – Present

- Designed and implemented visually appealing and responsive user interfaces using Material UI components, leveraging its extensive library for efficient design and component creation. This ensured a consistent and intuitive user experience across the application.
- Utilized Material UI's theming capabilities and advanced styling options to maintain branding consistency and achieve pixel-perfect designs, enhancing the overall look and feel of the application.
- Leveraged React Query for efficient data fetching and management from APIs, ensuring seamless integration with Material UI components and enhancing application responsiveness.
