SUMMARY

Results-driven Software Engineer with 4+ years of experience designing and developing scalable, high-performance web applications using React.js, Next.js, Tailwind CSS, Redux, and Salesforce technologies (Lightning Web Components, OmniStudio). Experienced in translating business requirements into intuitive UI solutions, optimizing performance, and integrating secure, scalable APIs across web and CRM platforms.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Material UI, Redux, React query, Three.js, Framer Motion.

Salesforce: Salesforce Platform, Lightning Web Components (LWC), Apex (Controllers, SOQL), OmniStudio / OmniScript, Salesforce Security & Data Model.

Backend & APIs: Node.js, Express.js, MongoDB, REST APIs. Other Tools: WebSockets, NextAuth, OAuth, JWT, Git, Vercel.

Soft Skills: Problem-Solving, Agile Development, Code Reviews, Team Collaboration.

WORK EXPERIENCE

Software Engineer

May 2025 - Present

Ahmedabad

- Working on Salesforce-based applications, including LWC (Lightning Web Components) and OmniStudio (OmniScripts, DataRaptors) for enterprise clients.
- Developing and customizing UI components integrated with Salesforce objects to support business workflows.
- Handling data flow between LWC and OmniStudio, ensuring seamless user interactions and performance.
- Implementing validations, data mapping, and integrations aligned with Salesforce best practices.
- Collaborating with functional consultants and backend teams to deliver scalable CRM solutions.
- Actively involved in requirement analysis, development, testing, and deployment cycles.

Freelance Software Developer(Salesforce & Frontend)

July 2024 - April 2025

Remote

- Designed and developed interactive, high-performance web applications using Next.js, React.js, and Tailwind CSS.
- Built dynamic and animated landing pages, dashboards, and portfolio websites using Framer Motion and Three.js.
- Developed and customized Salesforce Lightning Web Components (LWC) for client-specific CRM requirements.
- Implemented Apex controllers and SOQL queries to support Salesforce business logic and data operations.
- Worked on resume builder and AI-powered content generation tools, integrating OpenAI's GPT API for automated content creation.
- Created custom dashboards using React Query and Redux for seamless data fetching and state management.
- Provided technical consultation to clients, improving product UI/UX, architecture, and development workflows.

Vericap | Frontend Engineer

May 2023 - June 2024

Bengaluru

- Developed investment dashboards using Next.js, React.js, and Material UI, improving investor insights and usability.
- Optimized data fetching with React Query, reducing API load times by 25% for a seamless user experience.
- Designed responsive and interactive UI components, ensuring smooth navigation across desktop and mobile devices. Integrated financial data visualization tools, enabling real-time insights into investment portfolios.
- Integrated financial data visualization tools, enabling real-time insights into investment portfolios.
- Implemented authentication and security features using NextAuth, JWT, and role-based access control (RBAC). Collaborated with backend teams to integrate APIs for user portfolio tracking and asset management.
- Conducted A/B testing and UX improvements, increasing user engagement by 15%.
- Refactored and optimized codebase, enhancing performance, maintainability, and reducing technical debt.

Solulab | ReactJs Developer

Nov 2021 - Jan 2023

Remote

- Engineered and refined intricate React components for large-scale web applications, enhancing user experience with intuitive designs.
- Conducted performance optimizations, refactoring legacy code and improving page load speeds by 30%.
- Collaborated with cross-functional teams to drive feature development while ensuring timely delivery and high-quality standards.
- Integrated financial data visualization tools, enabling real-time insights into investment portfolios.
- Implemented secure authentication using NextAuth, JWT, and role-based access control (RBAC).
- Led code reviews and knowledge-sharing sessions, improving best practices and team efficiency.

PROJECTS

Mogul

- Developed and maintained a real estate investment platform using React and Material UI, ensuring a responsive and intuitive UI for property listings and investment tracking.
- Implemented advanced features such as property search filters, interactive maps, and user dashboards, enhancing user experience and engagement.
- Integrated real-time APIs for property valuations and market trends, enabling users to make data-driven investment decisions.

Vericap

- Worked as a Frontend Engineer at Vericap, building tools and infrastructure using Next.js, Monorepo, and Material UI to empower investors in sourcing, screening, and managing carbon investments.
- Developed and optimized user interfaces for carbon investment dashboards, providing investors with clear insights and management tools.
- Collaborated closely with backend teams to ensure seamless integration of real-time data and financial metrics, enhancing investor decision-making.

Synergy – Patient Engagement Platform (Salesforce Health Cloud)

- Built Synergy, a patient engagement and care coordination platform using Salesforce Health Cloud.
- Designed and customized Health Cloud data models to manage patients, care plans, clinical timelines, and provider interactions.
- Implemented OmniStudio (OmniScripts, DataRaptors, Integration Procedures) to build guided patient and care-provider workflows.
- Used DataRaptors to efficiently read, transform, and write patient and clinical data within Salesforce.

PERSONAL PROJECTS

Chatty (Chat App)

- Developed and maintained a real estate investment platform using React and Material UI, ensuring a responsive and intuitive user interface for property listing and investment tracking.
- Implemented advanced features such as property search filters, interactive maps, and user dashboards, enhancing the user experience and engagement.
- Integrated real-time APIs for property valuations and market trends, enabling users to make informed investment decisions.

My Portfolio

- I built this portfolio using Next.js, Tailwind CSS, and Framer Motion to showcase my skills as a frontend developer. The portfolio features a clean, responsive design with smooth animations and transitions, providing an engaging user experience

Energy Billing & Payments Platform (Salesforce Energy Cloud)

- Built an end-to-end Energy Billing & Customer Payments platform using Salesforce Energy Cloud to manage energy consumers, usage data, and billing cycles.
- Designed and customized Salesforce Energy Cloud data models to track energy consumption, meter readings, billing periods, and customer contracts.
- Developed Lightning Web Components (LWC) for:
Customer billing dashboards, Real-time energy usage summaries, Invoice and payment status views
- Integrated Stripe Payment Gateway to enable secure online payments for energy invoices.
- Implemented Stripe Webhooks to handle real-time payment events such as:
Payment success, Payment failure, Refunds, Subscription updates
- Built Apex webhook handlers to securely receive and process Stripe webhook events.

EDUCATION:

Bachelor of Education in Computer Science

Gujarat Technological University

Aug 2016 - Nov 2026
